Map Generation Invariants & Urban Plat Standards

Ecological & Agricultural Boundaries

- **Zero Farms in Forests:** Farm parcels (Field, Orchard, Pasture) never generate in `Biome.Forest` or inside standing timber.
- **Zero Crops in Deserts:** Deserts maintain natural wind-swept sand dunes; agricultural pivots strictly excluded.
- **Hydrological Setback:** 1-tile grass buffer mandatory between all crops/sensitive buildings and lake/river water.
- **Ecotones:** 3-tile organic dither transitions between biomes.

Zoning, Parking & Civic Infrastructure

- **Block Purity:** 100% of residential homes have street frontage. Block interiors are reserved for backyards, sheds, and pools.
- **Industrial Separation:** Factories and warehouses maintain ≥6 tile distance buffer from elementary schools, high schools, and churches.
- **100% Parking Lot Adjacency:** Every commercial and civic anchor is guaranteed an adjacent blacktop parking lot.
- **Multi-Footprint Architecture:** Residential zones feature 4 distinct footprints (Ranch w/ garage, Two-story colonial, L-plan, Bungalow w/ veranda).
